

ALUMINIUM NAILS

SKG WE manufactures ALUMINUM NAILS for building construction especially in Concrete & Plastic Spacers and for Roofing purpose.

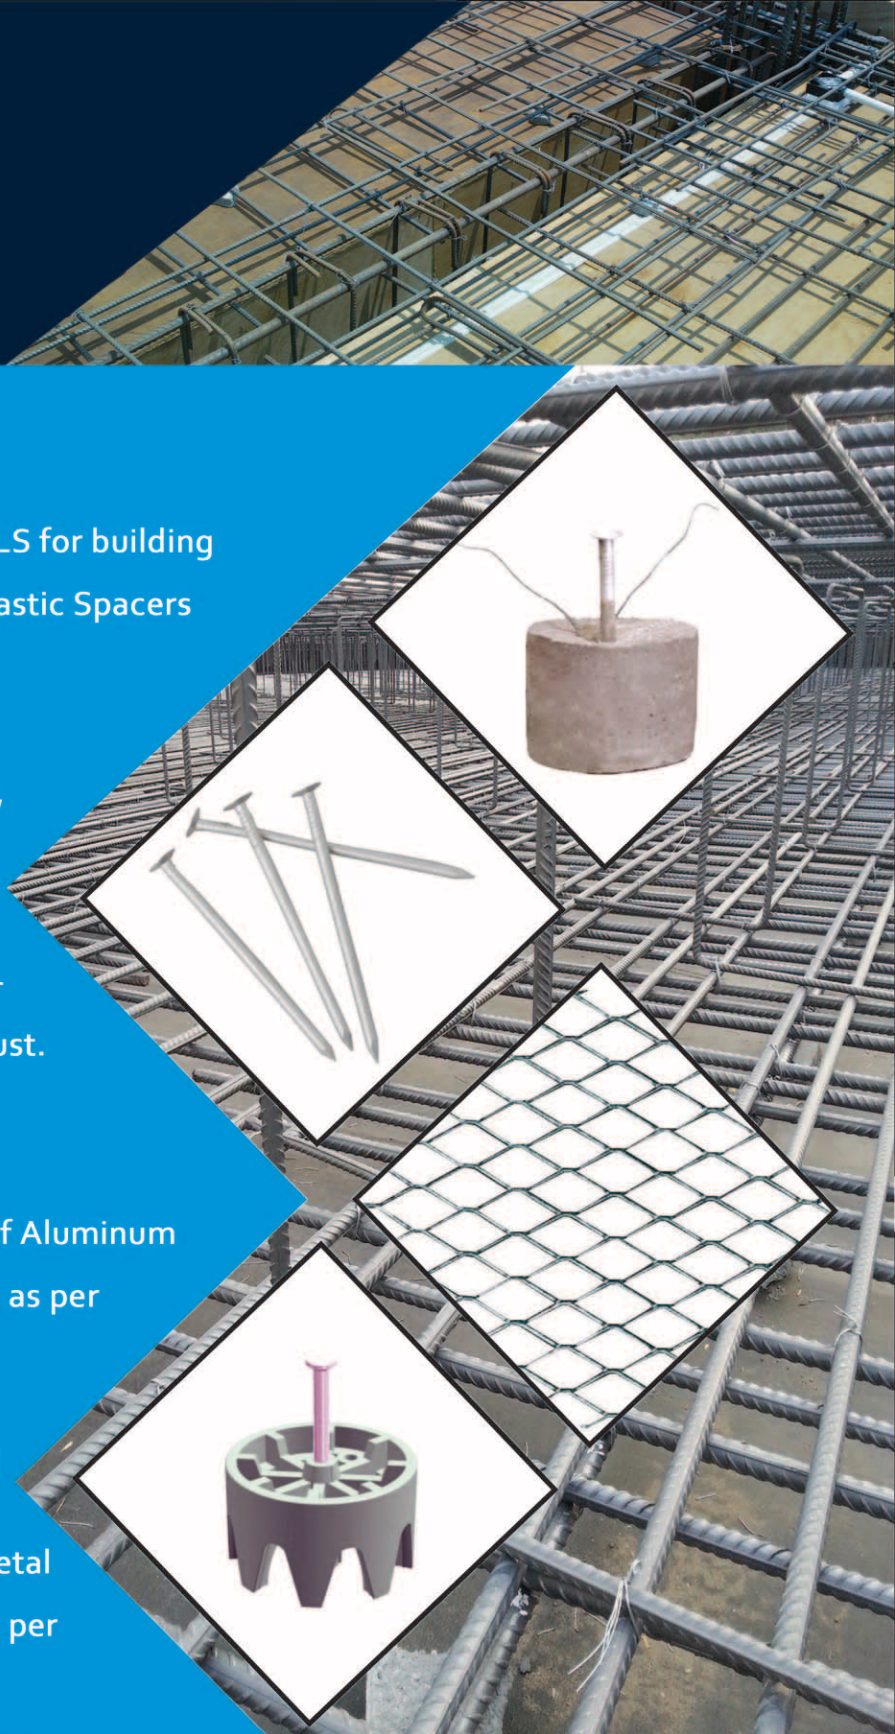

Advantages of aluminum nails over iron, steel or hard metal nails:

- Aluminum Nails are Low weight.
- Superior protection against corrosion - Durable because aluminum does not rust.
- Easy installation.

We produced almost all common sizes of Aluminum nails, special sizes can also manufacture as per customer requirement.

EXPANDED METAL MESH

We are also manufacture expandable metal for construction purpose, mesh sizes as per customer requirement.
