

ALUMINIUM PRODUCTS

SKG WE manufacturing Aluminum nails, badges/tags/ marking boards & other signs to trees, we also produced Aluminum products for nesting boxes.

Advantages of aluminum nails over iron, steel or hard metal nails:

- Superior protection against corrosion- Durable because aluminum does not rust.
- The chainsaw is not destroyed when the trees are harvested, aluminum nails does not damage the saw blade.
- Aluminum is light and anti-magnetic.
- Copper or steel can damage the tree, but aluminum does not.

Steel nails were previously used for marking and also for nesting boxes, now they are no longer permitted in most areas.

We produced almost all common sizes of Aluminum nails tags/badges and nesting boxes Accessories.

Special sizes can also manufacture as per customer requirement.
